NOW

HOW IT ALL STARTED

Group J. Pollet is a family-owned business founded in 1969 by Mr. & Mrs. Pollet. The Pollet family started with a supermarket called Unic in Koekelare (Belgium). Later on, the name changed from Unic to GB, and then to Carrefour. In the next two decades, the group expanded with several super markets and a franchise of Hubo and Gamma DIY stores.

In the early nineties, Group J. Pollet invested in the water treatment market through the acquisition of Euraqua Europe. In the last 25 years, the group rapidly expanded in this important water sector. The division, called Pollet Water Group, now has 28 specialised water-treatment companies.

Following the expansion in water treatment, Pollet Water Group started to supply components to the swimming pool industry through its existing network of companies. In response to growing market demand, Pollet Pool Group (PPG) was created in 2004. Today PPG consists of 7 distribution companies and 2 manufacturers (Aquadeck and NIVEKO). The Dutch specialist Pomaz has also been part of Pollet Pool Group since 2019, strengthening our distribution platform. In 2021, VB Klimaattechnik joined the Pollet Pool Group.

In 2019, Pollet acquired Sterima, Hemotech, Hema T. Medical and Medicole. Pollet already had two German companies (DWA and Herco) in the group that are active worldwide in water treatment for dialysis. Following these acquisitions, Pollet decided to consolidate all its medical activities in Pollet Medical Group. Today Pollet Medical Group has specific know how, solutions and services to achieve the best possible quality of life for dialysis patients.

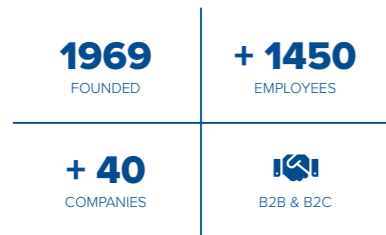

Pollet Water Group, Pollet Pool Group and Pollet Medical Group all are part of Pollet Group. Follow our journey on www.polletgroup.com

PART OF POLLET GROUP

Pollet Water Group is part of Pollet Group, which is active in three sectors: water treatment, swimming pools, and health care. Within these three fields, the Group has companies across Europe, the Middle East and Africa. We work closely with dedicated partners all over the world. Our programme of continuous expansion is based on intensive cooperation with our customers, our striving for sustainable solutions and continuous improvement, and recruitment of talented employees. Pollet Group is part of Group J. Pollet, which also owns a chain of ten retail stores in franchise with Carrefour.

POLLET WATER GROUP

Pollet Water Group is a worldwide water specialist, offering products, solutions and brands for the home market, hospitality, commercial buildings and industry. We treat the water in your home to protect the piping and your household devices and enhance your water experience. We improve the taste of the water you serve in your restaurant, café or bar. We help your business shift from traditional bottled water to POU drinking water systems and personalised bottles. We protect your professional kitchen equipment and make your crystal shine. We ensure your apartment, school, hospital or office benefits from perfectly treated water and protect your building against the harmful effects of hard water. We offer drinking water solutions for your residents or employees. We design and build water installations for your production plant. We treat water from alternative sources to reduce operating and energy costs and improve your production processes. We close the loop by designing and building your wastewater treatment installation.

HOW DO WE MAKE A DIFFERENCE?

We work through the Pollet Water Group network with 5 manufacturers, 21 distribution offices and 2 engineering companies. We draw on over 1000 employees, an extensive distribution network with daily shipments, 24/7 delivery, and export capability worldwide. We invest in product development by building environmentally friendly solutions, personalised products and collaborations with top brands. We offer dedicated customer service with technical support, water analyses, calculations, costings, commissioning and installation. We focus on water treatment companies, OEMs, DIY, public authorities and sanitary wholesale.

SUPPORTING OUR GLOBAL WATER TREATMENT CUSTOMERS

DISTRIBUTION

Pollet Water Group has companies in 14 countries over Europe and Africa. Thanks to our local presence, we can support our dealers and partners in sales, R&D and logistics. Our headquarter in Belgium is the ideal location to serve customers worldwide. Our warehouses allow us to keep a large number of components and spare parts in stock and minimise delivery times. Thanks to our network of companies, we act locally but

think globally. Our local offices have extensive regional market knowledge together with a worldwide presence. We attach great importance to customer service by offering technical support, water analyses, calculations, costings, commissioning and installation. We maintain an extensive stock of components in more than 250.000 m² of warehouse space.

ECOLOGICAL BENEFITS AND OPERATING PROFIT

ENGINEERING

90% of our worldwide demand for water comes from industry and agriculture. Our technologies allow you to optimise your water consumption and utilise alternative water sources to reduce operating and energy costs and improve your production process. Thanks to our know-how and engineering skills, our experts can advise, design and build the installations for your water facilities. With a focus on environment and cost

reduction, we assist you from analysis to installation and automation. Our teams can rely on years of experience in the most diverse sectors, such as food, metal, surface treatment, the pharmaceutical and chemical industry. Our approach provides our customers with both ecological benefits and operating profit. That is how we take care of water so you can focus on your core business

CRAFTING YOUR WATER TREATMENT SOLUTIONS

MANUFACTURING

Pollet Water Group is an expert when it comes to water treatment. We supply standard solutions as well as made-to-measure concepts. To maintain our technological lead, we continuously invest in our manufacturers. Pollet Water Group has production facilities in Germany, France, Turkey, Belgium and the UK. We analyse, design and engineer solutions for your water facilities. We attach great importance to an envi-

ronmentally and technologically responsible selection of resources. Our R&D teams are constantly searching for new and sustainable solutions. Our manufacturing capability gives our partners a competitive advantage through highly reliable energy- and water-saving solutions with optimised return on investment. Our manufacturers export worldwide and have global presence.

SUPPORTING OUR PARTNERS

As an international specialist in water treatment with a broad range of products and services for this growing market, we choose our partners very carefully. We cooperate with water treatment companies, sanitary wholesalers, OEMs, DIY and public authorities. We have a clear strategy to closely support them with our expertise and solutions. We think globally but act locally. That's why we have subsidiaries in most European countries to work as closely as possible with our local partners. We manufacture, work in partnership with renowned brands, and offer tailored solutions and products. We work white label and customise where needed. Thanks to this strategy, we build on trust and always act as a loyal and long-term partner.

WASTE WATER SOLUTIONS
CLOSING THE LOOP.

By applying the most advanced technologies, we take up the biggest challenge of our time: water.

PERFECT WATER. PERFECT HOME.

Before your tap water reaches your home, a water company will have already subjected it to various treatments. However, the calcium in your water often builds up scale in pipes, shower heads, steamers, washing machines and dishwashers. The home solutions provided by Pollet Water Group improve your day-to-day life and enhance your comfort. Our products enable end users to reduce water consumption, save detergents and soap, save energy and ensure maximum return on investment, and ultimately provide better quality of life.

Pollet Water Group offers IoT solutions to keep your home water softener connected. Our cloud-based platform offers you a high-end solution to access and adjust your water softeners remotely and give your customers a full service solution for a trouble-free softener.

DOMESTIC SOLUTIONS

- Softeners
- Filtration
- Ultra-filtration
- Reversed Osmosis (RO)
- UV
- Disinfection
- Filters
- Point Of Use devices (POU)
- POU drinking dispensers
- Components

OUR ADDED VALUE

- Wide range of components and solutions
- Extensive stock of spare parts
- PWG proprietary products
- Private label - White label
- Environmentally friendly products
- Strictly B2B
- Multi-brands
- Exclusive solutions
- Technical expertise and support
- Worldwide presence

PALLAS ENJOY SMART

GREAT WATER. GREAT TASTE.

Pollet Water Group offers packaged solutions for the hospitality business. We examine every process that involves water in your establishment and offer a solution to create unique water for every need. Our solutions optimise your resources and reduce damage.

Better water not only influences your equipment, but also the taste of your coffee, your tea and your ice. More and more hospitality businesses are shifting from traditional water bottles to drinking water they can produce themselves. Point of use drinking water units eliminate the need to purchase bottled water for your restaurant or bar. They allow you to use personalised bottles and improve your branding. Furthermore, these solutions save a lot of money. Our water filtration systems are available with carbonation, chilling and heating options.

HOSPITALITY SOLUTIONS

OUR ADDED VALUE

- Softeners
 - Filtration systems

SAFE WATER. SAFE BUILDINGS.

Commercial buildings such as apartments, offices and small industrial plants are big water consumers. Your business and buildings rely on the availability of water. Along with growing demand, your water resources need to be protected, safe and of high quality. A business with clean, treated water is a business that saves time and money. Our building products avoid costly replacements due to the damaging effects of hard water. Our engineers develop solutions to treat your water sources with the best possible effect.

In addition, Pollet Water Group improves your comfort by offering solutions such as smart and user-friendly water coolers. These solutions with patented green technology and proven energy savings will help you reduce the number of bottles you use.

COMMERCIAL SOLUTIONS

RELIABLE WATER. RELIABLE PRODUCTS.

Water is a precious and universal substance. Without water, there would be no life, no agriculture, and no industry. Industry and agriculture account for 90% of the worldwide demand for water. Our technologies allow you to optimise your water consumption and utilise alternative water sources to reduce operating and energy costs and improve your production process.

Pollet Water Group has acquired valuable experience in the UV sector. UV is a modern chemical-free technology that leaves no taint or residue in the water. UV can also be used in the food industry for both air and surface treatment, leading to longer shelf life. UV can be used in both clean water applications and in effluent treatment. Other market sectors include agriculture, aquaculture and swimming pools.

INDUSTRIAL SOLUTIONS

OUR ADDED VALUE

- Softeners
 - Reversed Osmosis (RO)
 - Filtration systems
 - Ultra-filtration systems
